Materials

- / Various metals
- / Brittle materials including glass, ceramics, sapphire and PCD
- / Silicon, Silicone
- / PET, PP, PI, PTFE, PCB
- / LCD, LED, OLED, microLED display panels
- / Solar cells

Applications

/ Drilling / Cutting / Patterning / Structuring / Ablation / Dicing / Micromachining / LCD, OLED cutting / Laser induced forward transfer / Sapphire structuring and dicing / Ceramics micromachining / PCD drilling and tracing / Silicon scribing / PET, PP, PTFE, Silicone cutting and drilling

Industrial High Power Picosecond Lasers

Atlantic

High-energy and high-power water-cooled Atlantic series picosecond lasers are designed for a variety of industrial applications.

Suitable for LCD or OLED display cutting and drilling, laser induced forward transfer (LIFT), glass and sapphire processing, micromachining of ultra-hard materials, ablation of metals, cutting and drilling of polymers, silicon scribing, solar cell scribing and many more.

Superior beam quality parameters, maximum available average power (80 W @ IR / 40 W @ VIS / 30 W @ UV), maximum available pulse energy (200 μ J @ IR / 100 μ J @ VIS / 75 μ J @ UV) and maximum pulse repetition rate (up to 1 MHz) are beneficial where high processing quality and high throughput are required.

To tailor laser performance for specific industrial applications, advanced electronics enable external gating (including PSO), synchronization and precise laser triggering as well as instant signal amplitude control.

To maintain reliability and assure long-term stable operation in an industrial environment, optical components are installed in a sealed, robust, precisely machined monolithic aluminum block. Designed for robust, low maintenance operation, Atlantic series lasers offer maximum reliability due to an optimized layout, PC controlled operation, a built-in self-diagnostic system and advanced status reporting.

For industrial high-power UV laser applications, high reliability and low ownership cost of UV components is crucial. To meet these requirements, the optical layouts of Atlantic UV models are optimized for longevity and stable operation in the UV range, resulting in a UV optics lifetime of 8,000 hours.

A unique optional feature of Atlantic high-power lasers is that they can work in both picosecond and nanosecond modes. This 2-in-1 laser solution is beneficial for some materials processing (such as glass or ceramics), where both very high accuracy, low processed surface roughness and high throughput are required at low cost.

Features

Up to 80 W at 1064 nm

Optional **532 nm** and **355 nm** wavelengths (could be all 3 electronically switchable wavelengths)

Up to **1 MHz** repetition rate

Up to 200 µJ pulse energy

Short pulse duration 10 ps

M²<1.3

Versatile laser control and syncronisation capabilities

Smart triggering for synchronous operation with polygon scanner and PSO

Monolythic, sealed and rugged design

Low ownership cost

Nanosecond pulse duration mode (optional)

At 1064 nm

At 532 nm 40 W **At 355 nm** 30 W 75 μJ

Ordering Information

Delivery	Products are made and dispatched within agreed term. Shipping charges are object of agreement between EKSPLA and customer.
Ordering	Orders may be placed by mail, fax or e-mail. All orders are object of General Sales Conditions, which can be found on www.ekspla.com . Mail orders should be sent to: EKSPLA, UAB Savanoriu Av. 237 LT-02300 Vilnius Lithuania Phone: +370 5 264 96 29 Fax: +370 5 264 18 09 E-mail: sales@ekspla.com Ask for quotation online at www.ekspla.com.
Certicate of Origin	All items shown in this catalogue are of Lithuanian Origin (EU). Certificate of Origin is available under request.
Warranty	All products are guaranteed to be free from defects in material and workmanship. The warranty period depends on the product and is object of agreement between EKSPLA and customer. Warranty period can be extended by separate agreement. EKSPLA does not assume liability for unproper installation, labour or consequential damages.
Specifations	Due to the constant product improvements, EKSPLA reserves its right to change specifications without advance notice.
